Bring Machine
Learning To All

Our Mission

Leverage Supply Chain Data across all stakeholders, improving Visibility, improving Cost to Serve, support Network Design and help to drive Organizational Efficiency.

DISCOVER

Get insights from real-time static data.

DIGITIZE

Enrich static data with digital sources, smart machines, sensors, blockchain

PREDICT

Use cognitive services to detect possible future events or triggers.

Not so long ago...

- Rocky start in 1997
- Market capitalization 60B USD
- Technology pioneer

- 60.000 people, 1800 stores
- US, UK, Japan, Canada, Brazil, Australia...
- Dominant market position in 80', 90'...

Meet Alexa:

WCS 2017: Get ready for air cargo disruption on the Horizon

MARCH 13, 2017
BY RANDY WOOD

ABU DHABI, UAE — For most of the last 50 years, the symbol of a successful “future” has been the long-promised, never-realized flying car. While most of us have long ago given up dreams of seeing these hybrids to the air in real life, that is exactly the catalyst that has driven entrepreneur Silven Rangelov and his aeronautical brother, Konstantin, to develop the prototype of an unmanned drone that will soon be able to

Will the air cargo industry hire Alexa?

MARCH 17, 2017
BY CHARLES KAUFFMAN

With the release of a new “Cargo Trace skill” that can be taught to Amazon’s interactive app, Alexa, Luxembourg-based CHAMP Cargosystems is adding voice-controlled track-and-trace capabilities to its *Traxon* air cargo shipment tracking platform.

Stakeholders in the air cargo supply chain will be able to track the status of air cargo shipments moving on dozens of airlines simply by dictating the eleven-digit waybill numbers to an Alexa-equipped device.

CHAMP Cargosystems is teaching Amazon’s Alexa a few lessons about air cargo.

CHAMP Cargosystems CEO, Arnaud Lambert said of the Alexa skill on social media, “Why do we restrict ourselves to keys, mouse and finger swipes? Let’s approach air cargo efficiency from a different angle: voice.” He added, “This is only the start of the new User Experience program.”

WCS 2017: Disruption finally hits air cargo as carriers pivot

MARCH 15, 2017
BY LEWIS KING

ABU DHABI — There has been talk in recent years about the wave of digital disruption coming to air cargo.

That wave appears to have arrived.

Once-KLM Martinair Cargo, as an example, is on its way to true digital transformation, said Laurent Angin, the carrier’s Vice President Marketing, Digital & Communication. Petitmangin said Air France-KLM has undertaken a project to improve its data quality – an important step toward incorporating more data into its operations.

Decided to lead the change,” Petitmangin told the packed Digital Transformation track at IATA’s WCS 2017 in order to be “closer to the customers.”

Carriers are following suit. While major carriers are brainstorming ways to get ahead of the digital transition, a key question remains: Is air cargo moving fast enough?

In line with WCS panelists, stakeholders need to pick up the pace.

Disruption is coming,” said Celine Hourcade, head of cargo transformation at IATA.

That was the clear message from the Horizon Innovation forum held in Abu Dhabi on the eve of the opening of today’s IATA World Cargo Symposium 2017 at the ADNEC exhibition and conference centre.

BookHotel

Intents

An Intent performs an action in response to natural language user input

Utterances

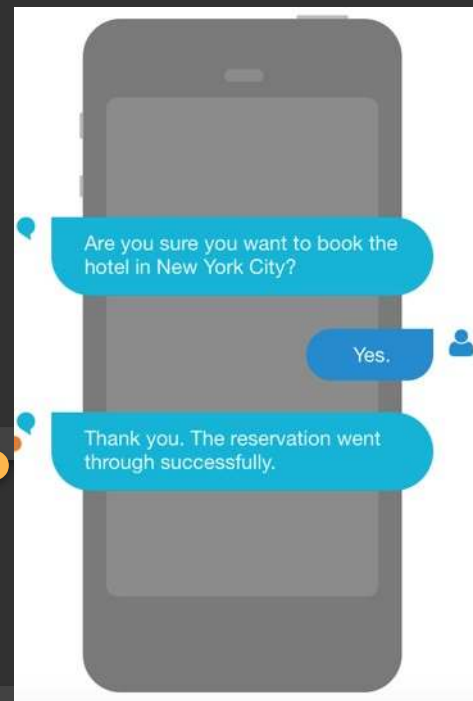

Spoken or typed phrases that invoke your intent

Slots

Slots are input data required to fulfill the intent

Fulfillment

Fulfillment mechanism for your intent

Utterances

I'd like to book a hotel

I want to make my hotel reservations

Can you help me book my hotel?

I want to book a hotel in New York City

Slots

Slot	Type	Values
destination	City	New York City, Seattle, London, ...
Check In	Date	Valid dates
Check Out	Date	Valid dates

Slot Elicitation

I'd like to book a hotel

Sure what city do you want to book?

New York City

City
New York City

What date do you check in?

Nov 30th

Check In
11/30/2016

Fulfillment

Intents and slots passed to
AWS Lambda function for
business logic
implementation.

**AWS Lambda
Integration**

User input parsed to derive
intents and slot values.
Output returned to client for
further processing.

Amazon Polly

- A service that converts text into lifelike speech
- Offers 47 lifelike voices across 24 languages
- Low latency responses enable developers to build real-time systems
- Developers can store, replay and distribute generated speech

Amazon Polly: Language Portfolio

EMEA:

- British English
- Danish
- Dutch
- French
- German
- Icelandic
- Italian
- Norwegian
- Polish
- Portuguese
- Romanian
- Russian
- Spanish
- Swedish
- Turkish
- Welsh
- Welsh English

Americas:

- Brazilian Portuguese
- Canadian French
- English (US)
- Spanish (US)

APAC:

- Australian English
- Indian English
- Japanese

Amazon Polly: Quality

Natural sounding speech

A subjective measure of how close TTS output is to human speech.

Accurate text processing

Ability of the system to interpret common text formats such as abbreviations, numerical sequences, homographs etc.

Today in Las Vegas, NV it's 54°F.

"We live for the music", live from the Madison Square Garden.

Highly intelligible

A measure of how comprehensible speech is.

"Peter Piper picked a peck of pickled peppers."

Amazon Polly features: SSML

Speech Synthesis Markup Language

is a W3C recommendation, an XML-based markup language for speech synthesis applications

```
<speack>
```

```
    My name is Kuklinski. It is spelled
```

```
    <prosody rate='x-slow'>
